# Introduction

In Fall 2022, University of Louisiana at Lafayette partnered with Campus Climate Surveys, LLC to conduct a comprehensive campus climate survey for employees and students. The Viewfinder® Campus Climate Survey for Administrators, Faculty, and Staff and the Viewfinder® Campus Climate Survey for Students were administered.

Understanding your campus's climate is an important step toward ensuring your institution's future success — and that of your employees and students. Viewfinder® Campus Climate Surveys are designed to help colleges and universities measure and assess both their strengths and weaknesses around diversity and inclusion efforts for administrators, faculty, staff and students. Survey results provide insight into the factors that shape the experiences and perceptions of diverse individuals on campus. Doing so helps institutions create an environment where everyone feels safe, welcome, valued and respected.

The following University of Louisiana at Lafayette Custom Benchmarking Data Report for Students, prepared by Campus Climate Surveys, LLC, is a summary of the results from data collected on the Viewfinder® Campus Climate Survey for Students. The results are shown in comparison to other institutions selected by The University of Louisiana at Lafayette deemed to be among their peers. There are four peer institutions that previously administered Viewfinder® campus climate surveys that are included in this report. They include Arkansas State University, University of South Alabama, Northern Illinois University, and Western Michigan University. Because each institution has the opportunity to customize their survey questions, some of the questions may not match for each of the peer schools and, therefore, are not included in this report. This report includes thirteen sections from the Viewfinder® Campus Climate Survey for Students that examines various aspects of campus diversity, equity, and inclusion.

All information and data included in this report may not represent the views of the entirety of the populations at University of Louisiana at Lafayette or its peer institutions, and only represent the views, opinions, and experiences of those who participated in the surveys.

Viewfinder® Campus Climate Surveys include the opportunity for respondents to provide open-ended responses at the end of some of the questions. However, those responses are not included in this report.
